# NOT JUST ANOTHER TRAINING COMPANY

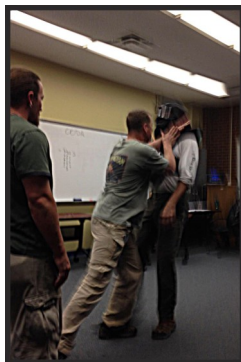

## Our Philosophy

S3 provides consulting, tailored training, and outfitting services to people and organizations working in the most demanding environments around the world. We pride ourselves on exceeding the

expectations of our clients and focusing on the quality, not quantity, of products or services provided. We give every customer the personal attention they deserve while providing them with customized

solutions to their unique requirements. S3's safe, practical and efficient training programs are rooted in science, physiology and psychology and have grown out of our staff's passion for serving in and training the military, public safety and responsible civilian communities. Our training programs will exceed your expectations.

## How We Do It

We respect and value that you have limited time and resources to devote to training, and we understand the need to maximize training

opportunities. When developing customized programs, S3 leverages decades of global work experience and strategic partnerships to deliver the right product. We work with progressive companies that are leading the industry in the

research and development of behaviorally based training programs. Our unique combination of experience and these partnerships allow us to provide you an efficient, practical, and effective training program tailored to maximize your training resources. We will ensure your people are prepared for the challenges they face.

## Our People

We do not compromise and you should not have to. S3's staff of passionate experts has been independently certified by military and civilian organizations.

Our staff not only lead specialized military and law enforcement units, but have also served at the schoolhouses responsible for preparing these teams. We have safely executed high risk, demanding and complex operations and training evolutions throughout the world. We will bring that same dedication to your training programs to ensure they are

taken to the next level. We train what we lived.
